

Customer Site

Network Termination Equipment will present either an RJ45 or SFP port.

Managed CPE will connect to the NTE

Exchange Connection

The 2 or 4 copper pairs connect to equipment at the local telephone exchange. We bond the lines together to create a single connection.

From here we take the connection back to our network using fibre optic technology.

Connect to the network

Once connected to our Next Generation Network we provide a number of possible services:

- Direct Internet Access
- Virtual Private LAN Switching
- Multi-Protocol Label Switching
