

System Developer

Location: Southend on Sea, Essex

Company Description

Optinet provides Communications Infrastructure services, including fibre, connectivity, voice and managed WiFi services to the world's leading businesses. We heavily focus on customer service and provide unrivalled industry expertise using advanced network technologies.

Position Description

An exciting opportunity has arisen at our Southend offices for a Systems Developer.

You will heavily contribute to the development of our new systems, liaising with customers, suppliers, network operations and finance.

The system will provide an end-to-end solution across the business covering:

- Sales (Lead tracking, status, create contracts and map relationships)
- Quoting (API driven quote system to our suppliers, issue customer proposal)
- Order Conversion
- Provision Management and Service Delivery
- Support (automated network testing, ticketing, monitoring and email/sms alerting)
- Billing (API with Direct Debit and accounting systems)
- Back-office, core network management, supplier management

Skills Required:

- Essential – Experience in MVC frameworks such as ExpressJS (preferred), Laravel or Ruby on Rails
- Essential - HTML, CSS, JavaScript
- Desirable - Linux, PHP, Apache Web Server, MongoDB or MySQL
- Desirable - REST API's
- Desirable - jQuery, Vue.js or React.js

Rewards

- Competitive salary
- Access to cutting edge network and compute resource
- Bonus opportunities
- Mobile phone
- Free refreshments
- Part of a small, flexible and casual working environment
