

Asymmetric Digital Subscriber Line

Customer Site

Network Termination Equipment will present on a normal BT phone socket.

Managed CPE will connect to the NTE

Exchange Connection

The copper pair connects to equipment at the local telephone exchange where it terminates on an MSAN.

From here we take the connection back to our network using fibre optic technology.

Connect to the network

Once connected to our Next Generation Network we provide a number of possible services:

- Direct Internet Access
- Multi-Protocol Label Service
